EARLY STAGE META-ROCKER

Provides a smooth ride

ARAHI 5

STABILITY WITHOUT LIMITS.

With every iteration, the Arahi rewrites history as a different class of support shoe. Boasting a seemingly contradictory combination of maximum cushioning and minimal weight, the **Arahi 5** delivers a soft, smooth alternative to traditional support shoes. A brand-new shoe from top to bottom, the **Arahi 5** was envisioned with a laser focus on fit. Designed with structured, engineered mesh at the heel for midfoot security and breathable, open mesh at the forefoot, the new upper is grounded in an extremely resilient, ultralight foam. Outfitted with an intuitive pull tab for easy on-and-off, this daily runner offers a refined collar shape that alleviates pressure on the Achilles. Get set for stability without limits.
